

AMENDMENTS TO THE SPECIFICATION

In the specification:

Please replace the first full paragraph of page 11 with the following amended paragraph:

As a twelfth aspect of the present invention, in either one of the first aspect and the sixth to the ninth aspects, the plurality of electrode fingers and the bus bar connecting the electrode fingers is formed of metal of which 5 principal component is aluminum. And, each partial area of the bus bar in which the thick film is produced has an additional thickness of not less than 0.05λ ~~not smaller than the film thickness of the plurality of electrode fingers~~ (where, λ is one period of the comb electrode).

Please replace the second full paragraph of page 11 with the following amended paragraph:

As a thirteenth aspect of the present invention, in the twelfth aspect, preferably, each partial area of the bus bar in which the thick film is produced has an additional thickness of not greater than 0.35λ ~~not greater than the film thickness of the plurality of electrode fingers~~ (where, λ is one period of the comb electrode).
